a From visual input to movement
Faults
F1-F5
8 command
cells
Visual input
314 sensory cells
Spiking model
138,639 neurons
Motion
steering + burst
visual feedback in geometric tests
b Measure three different outcomes
Transmission
command rate
Activity
network spikes
Task outcome
survival at 1 s
c Declare the assessment conditions
Which trials?
How long?
Which control?
Cohort | paired exposure + full horizon | feedback law
